

Discolored teeth, plaque buildup, tired gum tissue & bacterial growth needed to be professionally treated before DENTIXIA 123 Series arrived

Lets start with the plaque buildup. For this we use D1. I'm using a sprayer but you soak, rinse & brush using your regular toothbrush. Do this as long as you can and repeat daily until all plaque is gone

After the plaque is gone use D1 before each use of D2 & D3. It removes the saliva for 10-12 minutes and allows the ingredients to work better

Step 2  
rinse with D1 and then rinse & brush with D2. Repeat for 2 or 3 days or until teeth are sufficiently white and gums pink.  
D2 should be diluted with 1 part water to start.

Step 3  
is rebuilding the enamel. Rinse with D1 and then brush with D3. Repeat for 2 or 3 days or until teeth are no longer transparent. A new white enamel improves color as well

A  
kissable, fresh mouth is your reward. Repeat procedure as necessary to maintain beautiful, healthy, teeth.

## DENTIXIA™

#1, #2, #3

### 3-Step Dental Renewal Kit

Renews, Rebuilds, Restores  
& Whitens Neglected teeth

Dentixia 123 consists of all natural ingredients extracted from food derivatives, purified and reformulated to be of consistent quality and strength.

All 3 products, each in different ways, whiten teeth and kill germs

## DENTIXIA #1

Removes Calculus (Plaque)  
in Step 1

Removes Saliva (Biofilm)  
Pretreatment before steps 2&3

Shake D1 before use  
Rinse and brush daily until Plaque is gone

### Caution

Do not use if allergic to citrus  
If irritation occurs during use  
dilute with water

## DENTIXIA #2

Removes decaying gum tissue  
& whitens teeth

Pre-brush with D1 and within 10  
minutes rinse and brush with D2

Repeat daily

until gums no longer foam, teeth are  
pleasantly white and gums are  
a fresh pink color

Foaming and chalking is normal and is a reaction  
with bacteria and failing tissue

## DENTIXIA #3

Rebuilds thinning teeth  
Renews discolored enamel

Pre-brush with D1 and within 10  
minutes shake D3 onto brush and  
scrub with D3

Repeat daily

until teeth are no longer  
transparent, thin or discolored.

### Caution

Use Only As Directed. Swallowing is OK. Do not put in eyes or ears

These are professional strength products.

Dilute D1 1/1 with water on first use. If irritation occurs dilute once again

Dilute D3 1/1 with water on first use. If no irritation occurs don't dilute for next use.
